Timing and Structure
Michaelmas Term. 16 lectures. 16 Contact Hours + 3 Supervisions mixing lectures, case analysis and class discussion.

Aims
The aims of the course are to:

- Develop an understanding of fundamental marketing terms, concepts, principles, and theories.
- Develop an understanding of the close relationship between marketing and other functions within an organisation.
- Develop critical thinking and communication skills relating to marketing.

Objectives
As specific objectives, by the end of the course students should be able to:

- Display a fundamental understanding of the marketing management process in different environments, contexts and situations enabling students to use marketing approaches to facilitate goal achievement.
- Have a solid ‘first principles’ foundation, if wishing to pursue a career in marketing,
- If pursuing other career paths, have a sufficient understanding of marketing to be able to interact effectively with marketing personnel in cross-functional activities.

Content
Business has only two basic functions -- marketing and innovation. Everything else is a cost.

- Peter Drucker

Among business disciplines, marketing is the primary contact point between a business and its customers. Business majors and non-business majors will benefit by taking this course because nearly everybody wears a marketing hat during their career. Understanding marketing will help you whether you want to be an accountant, a movie producer, an engineer, a programmer, a doctor, or a museum curator. Understanding customer needs and how to marshal the resources of an organization to meet those needs will enhance your chances of career success.
This course develops a general management viewpoint in planning and evaluating marketing decisions – decision areas that include target markets, product, pricing, channels, and promotion. This course will also help you understand how marketing decisions are affected by organizational and environmental influences and will also enable you to develop your ability to contribute to general management. Accordingly, the course sessions are structured around the following topics:

- Introduction to Marketing.
- Understanding Customer and Context.
- Marketing Research.
- Understanding Company and Competition.
- Market Segmentation, Targeting and Positioning.
- Price and Promotion.
- Product and Place.
- Customer Loyalty and Relationships.

Coursework

Details to be announced in lectures.

There is no Full Technical Report (FTR) associated with this module.

Marketing Case Study Essay

Learning objectives:

- Identify one or more interrelated real-life marketing problems faced by the management of a product or service (or a collection of such under the same management) chosen by the student.
- State the problem(s), describe relevant background information, and suggest recommendations for the management in response to the problem(s).
- Apply course materials in the process to obtain an understanding of marketing in practice.
- Generate creative, relevant business ideas for marketing management.
- Write in an organised, concise manner with clearly presented and well-informed arguments in a business context.

Practical information:

- The essay is due for submission to the CUED Teaching Office by the end of the Michaelmas Term (the exact deadline to be announced in lectures).
- The student is expected to prepare and write up the essay at their own pace; the time and effort involved should be within the range for a standard coursework report.

Booklists

Indicative texts and a list of readings for each topic are given in the 3E2 Booklist, available via the Booklist for Part IIA Courses [2]. These include major readings as well as some extra readings. Students are NOT required to do the extra reading or purchase any of the books, but are encouraged to draw on them if they wish to explore some of the topics further.

Examination Guidelines

Please refer to Form & conduct of the examinations [3].

UK-SPEC
The UK Standard for Professional Engineering Competence (UK-SPEC) [4] describes the requirements that have to be met in order to become a Chartered Engineer, and gives examples of ways of doing this.

UK-SPEC is published by the Engineering Council on behalf of the UK engineering profession. The standard has been developed, and is regularly updated, by panels representing professional engineering institutions, employers and engineering educators. Of particular relevance here is the ‘Accreditation of Higher Education Programmes’ (AHEP) document [5] which sets out the standard for degree accreditation.

The Output Standards Matrices [6] indicate where each of the Output Criteria as specified in the AHEP 3rd edition document is addressed within the Engineering and Manufacturing Engineering Triposes.
