

Engineering Tripos Part IIA Project, GA4: Heat Pump, 2017-18

Leader

[Dr A J White](#) [1]

Timing and Structure

Fridays 11-1pm, Tuesdays 9-11am plus afternoons

Prerequisites

3A5 useful

Aims

The aims of the course are to:

- To critically assess the value of heat pump technology as a way of reducing emissions of CO₂.
- To design an experiment to measure the performance of the heat pump, and to make measurements which allow its performance to be modelled.
- To produce a model of the heat pump which is validated against the experimental measurements.

Content

This project looks at the performance of a commercially available heat pump for domestic heating applications. Students will be required to design, build and perform an experiment to measure the performance of the heat pump, and build a model of the heat pump. This model will be used to explore the CO₂ saving which could be made by using heat pumps in a domestic heating application. Students will work in groups of 4 to design and perform the experiment. Individual tasks may be distributed amongst group members as decided by the group. Individual reports are required from group members, as well as group reports.

Week 1

Familiarisation with the equipment. Construction of a simple matlab model of the heat pump. Design of the experiment. First interim (group) report and review meeting (20%).

Week 2

Refine experimental plan, build apparatus and make measurements on the performance of the heat pump using an external water circuit.

Week 3

Compare models with performance values obtained from the experiment (interim report). Interim individual report (30%)

Week 4

Measurements of availability loss within the heat pump and refinement of initial model. Improved assessment of carbon saving. Final individual report (30%). Group presentation to share results with classmates (20%).

Coursework

Coursework	Due date	Marks
Interim Report 1 (group)	2pm Tuesday 15 May 2018 (review meeting Friday pm)	16 (group)
Interim Report 2	4pm Tuesday 29 May 2018	24 (individual)
Presentation	week 4	16 (group)
Final Report	4pm Friday 8 June 2018	24 (group)

Examination Guidelines

Please refer to [Form & conduct of the examinations](#) [2].
