

Engineering Tripos Part IIB, 4M1: French, 2024-25

Module Leader

[Prof. David Tual](#) [1]

Lecturer

Prof. David Tual

Timing and Structure

Lent term. 7 lectures + seminars + coursework. Assessment: 100% coursework.

Prerequisites

Modules can be chosen by students with at least a B1/B2 (CEFR) level in the respective language (i.e. equivalent to AS or A-level). In any case, students wishing to take a language module must contact the relevant language coordinator in order to ensure they hold the necessary qualifications.

Aims

The aims of the course are to:

- improve understanding of French technology, society and culture.
- enable all students to consolidate their listening skills and practise their speaking skills in class, while particular emphasis will be put on reading and writing skills outside the class.

Objectives

As specific objectives, by the end of the course students should be able to:

- be confident in speaking/reading/writing whether in a general or work-related situation;
- use the language as a tool to improve understanding of technology, society and culture;
- analyse a topic/an issue in depth, compare all the elements at play, synthesise the major points and make a balanced judgement.

Content

Seminars (7 Lectures, various speakers, subject to changes)

- L'industrie des matériaux composites
- La politique française
- La cristallographie quantique
- Ingénieurs Sans Frontières
- Mai 68
- La nanostructuration spontanée
- Présentation du CEA

Seminars

Associated with each lecture will be a one-hour seminar. This may be held before the lecture for preparation, or following the lecture for discussion purposes.

Format may vary.

Coursework

The students will prepare 3 major pieces of coursework:

- **Oral presentation (10-15 minutes)** for both language and content (50% language, 50%

Coursework	Format
<p>Coursework activity #1 Report</p> <p>A structured report of 900 words in the target language</p> <p><u>Learning objective:</u></p> <ul style="list-style-type: none"> • Analyse, synthesise and/or critically evaluate a topic presented and discussed in class (topic related to science, technology or the culture of the French-speaking world) • Express ideas in a logical and articulate manner using a range of structures and expressions appropriate to the task and expected at the level of proficiency in the target language 	<p>Individual</p> <p>Non-anon</p>
<p>Coursework activity #2 Report</p> <p>A structured report of 900 words in the target language</p> <p><u>Learning objective:</u></p> <ul style="list-style-type: none"> • Analyse, synthesise and/or critically evaluate a topic presented and discussed in class (topic related science, technology or the culture of the French-speaking world) • Express ideas in a logical and articulate manner using a range of structures and expressions appropriate to the task and expected at the level of proficiency in the target language 	<p>Individual</p> <p>Non-anon</p>
<p>Coursework activity #3 Oral presentation</p> <p>A structured oral presentation (10-15 minutes followed by questions)</p> <p><u>Learning objective:</u></p> <ul style="list-style-type: none"> • Analyse, synthesise and/or critically evaluate a topic presented and discussed in class (a topic related to science, technology or the culture of the French-speaking world) • Express ideas in a logical and articulate manner using a range of structures and expressions appropriate to the task and expected at the level of proficiency in the target language 	<p>Individual</p> <p>followed b</p> <p>Non-anon</p>

Examination Guidelines

Please refer to [Form & conduct of the examinations](#) [2].

UK-SPEC

This syllabus contributes to the following areas of the [UK-SPEC](#) [3] standard:

[Toggle display of UK-SPEC areas.](#)

GT1

Develop transferable skills that will be of value in a wide range of situations. These are exemplified by the Qualifications and Curriculum Authority Higher Level Key Skills and include problem solving, communication, and working with others, as well as the effective use of general IT facilities and information retrieval skills. They also include planning self-learning and improving performance, as the foundation for lifelong learning/CPD.

IA1

Apply appropriate quantitative science and engineering tools to the analysis of problems.

IA2

Demonstrate creative and innovative ability in the synthesis of solutions and in formulating designs.

KU1

Demonstrate knowledge and understanding of essential facts, concepts, theories and principles of their engineering discipline, and its underpinning science and mathematics.

KU2

Have an appreciation of the wider multidisciplinary engineering context and its underlying principles.

P4

Understanding use of technical literature and other information sources.
